Dashboard Data

☐ Show Evaluation Performance area

Scorecard Default View

☐ Agent Performance

Scorecard Columns

☒ Allow agents to view rank in the Agent Performance grid

☐ View Dashboard in Observed score

Set the metadata field for Playback link

Internal Media Link

☐ Hide internal media link in EFI

Evaluations

☒ Add Draft mode time in Time to Publish

Setting options include:

- Dashboard Data - Show/hide the 'Evaluation Performance' section of the dashboard that shows the team's overall data.
- Scorecard Default View - Show/hide agents' individual performance on scorecards in the dashboard for that specified session.

- Scorecard Columns - Agents can show/hide the column to view their rank in the 'Agent Performance' grid.
- Set the metadata field for playback link - User can select the metadata field from the drop-down list for playback link.
- Internal Media Link - You can control the display of internal media link in the Media File section on the Evaluation Form Instances page. To hide the internal media link, select the Hide internal media link in EFI checkbox.
- Evaluations - During evaluation, when you save and close the form, the ongoing Time to Publish counter counts and adds the time till the evaluation is published. Clear the **Add Draft mode time in Time to Publish** checkbox to count only the actual edit mode time for an evaluation and not the draft mode time.
 - Draft mode time - The time when you are not editing an evaluation and it is in the saved and closed state.
 - The Time to Publish is calculated by subtracting the evaluation start time from the evaluation published time. By default, the draft mode time is counted and added. When you clear this checkbox, the draft mode time is excluded from Time to Publish.

Internationalization and Localization

Quality Central supports accessibility (508 Compliance), internationalization, and localization. You can use Account Settings to enable accessibility and to select the desired language.

You can use Quality Central in any of the supported languages. The supported languages include Russian, Simplified Chinese, Traditional Chinese, Korean, German, Portuguese, French and Japanese.

When you localize your UI and use minimum resolution of 1280*1024, some of the UI items may not be visible, you must zoom out the page to select the required elements.

Account Settings

To specify account settings:

1. Click the drop-down arrow to the right of your user name in the top right side of the application main window.
View Image

2. Click **Account Settings**.

View Image

3. In the **Choose Language** drop-down, select the desired language. The default language is English.
4. Select the **Enable Accessibility** checkbox to enable Accessibility.
5. Click **OK**.

Date is formatted according to the language configured in your browser, not the language configured in Quality Central. For example, if the default language configured in your browser is American English, the date will be displayed as m/d/y, if the default is British English, the date will be displayed as d/m/y.
