

Viewing Evaluations

In the grid, the evaluations that your evaluator sets to ignore are grayed out. You can still select and see the grayed-out evaluations. Under the grid, you can see:

- The date range of the search results.
- The number of evaluations.
- The average score of published evaluations, excluding any evaluation templates defined as Exclude score from average evaluation calculation.
- The hierarchy level metadata that you have selected using Settings.

You can control the selection of hierarchy levels available through metadata using the Visible check box available under the Hierarchy tab in the Management Console.

When you delete an evaluation form, it will not show up in the user screen or reports anymore. But, it stays in the database until it ages out of the system.

You can view the date and time of the published evaluation, which is stored in UTC format (Coordinated Universal Time). When a user opens the published evaluation, the system converts the UTC time to the user's local time zone. So, users in different time zones may see different dates and times for the same published evaluation.

The evaluations displayed here are based on the data restriction configured.

The data restriction will not be applicable if you have:

- Override Access Rights
- Given access in the Grant Access To field while performing the evaluation.

To view an interaction:

1. Filter on one or more filters at a time:

- **ID Contains** - enter numbers or letters to filter the display. Entering C displays all evaluations that are part of calibrations. Entering S displays all the self-evaluations.
- **From and To** - filter by published date.
- **Row Contains** - searches the entire row for the specified text in any column. Do not enter any special characters. When you are using filter, ensure that you select the correct search date in the From and To fields. Depending on the configuration in the Management Console, the search days vary. If the search dates do not match the configured value, a warning message displays.
- **Self-Evaluations Only** - filter to include only self-evaluations.

2. To display the filtered evaluations, click View. A list of evaluations is displayed in the grid. You can change the default view of the grid or manually change the width of the columns. Click

to add or delete columns as needed. User preferences are saved until they are changed by the user.

3. To see the interaction that you are looking for, select the evaluation ID from your list.

4. Review the interaction:

- For audio interactions, click Play/Pause. The Search function opens and the file playback launches.
- The primary file name is displayed in the Interaction File area above the player buttons, and any available metadata configured for the selected template appears in the Metadata grid. This form references <nbr> files display below the player buttons and indicates the total number of files associated with the evaluation. You can click the <nbr> files link to launch Search with each of the files related to this evaluation display. See [Playing Back Interactions](#) to learn more.
- To play interactions located externally, click External Playback. You can specify the external target's URL in Administration > Localization > Language and Accessibility. See [Playing Back Interactions](#) to learn more.
- For chat, email, and text talks, click the file name to see what's inside in the Metadata grid. If you want, can expand the contents into a movable dialog box as needed.

In the My Evaluations tab, search filters help you sort and arrange your evaluations based on evaluator, agent, and date.

- For chat evaluations with screen recordings, click the media file name in the media file area to launch the Pluggable Player with chat interactions and agent's screen recording. See [Playing Back Interactions](#) to learn more. The Pluggable Player is not accessible through the <n> media files or external player links.
