

## Create Evaluation Scorecards

After evaluation templates have been created in NiCE Quality Central, it is time to configure scorecards. See [Guidelines to Create Scorecards](#) to learn more.

To create evaluation scorecards:

1. Go to **Administration > Evaluation Scorecards > Scorecards**.
2. Click New. The New Scorecard window opens with the Properties tab selected.

3. In the Name field, enter the name for the scorecard.
4. Select the Use in Portal Dashboards check box to use this scorecard in Portal Dashboards. When you select this check box, the Included, Weight, Display, and Limit columns display on the main Scorecards window and the Thresholds and Agents Dashboard tabs are available.

View image

5. In the Description field, enter a description for the scorecard.
6. If desired, you can import scorecard columns from other scorecards. See [Import Scorecard Columns](#) to learn more.
7. To add a Column Metric to the Evaluation Scorecard, click New above the Columns grid. The New Column window opens.

|                   |                      |                                                                                                      |                        |
|-------------------|----------------------|------------------------------------------------------------------------------------------------------|------------------------|
| *Display Name     | <input type="text"/> | *Goals:                                                                                              |                        |
| *Metric           | (Select) ▼           | Type:                                                                                                | Single Directional ▼   |
| *Target Media Set | (Select) ▼           |                                                                                                      | 0 <input type="text"/> |
| Description       | <input type="text"/> | <input type="checkbox"/> Reverse                                                                     |                        |
|                   |                      | <input type="checkbox"/> Include "Caution" state                                                     |                        |
|                   |                      | Goal Thresholds/Legend                                                                               |                        |
|                   |                      | <input type="checkbox"/> Good 0 -                                                                    |                        |
|                   |                      | <input type="checkbox"/> Out of Bounds -                                                             |                        |
|                   |                      | (lower is better)                                                                                    |                        |
|                   |                      | Note: Scores equal to Goal boundaries are always assigned the category that benefits the individual. |                        |

OK Reset Cancel

8. Enter the column information for the scorecard. See [Columns](#) to learn more.
  - Display Name
  - Metric (see [Metrics](#) to learn more)
  - Target Media Set
  - Description
  - Goals (see [Goals](#) to learn more)
9. Click OK to add the column.
10. Add more columns as needed.
11. Select the Access Rights tab. The Access Rights grid displays.
12. In the grid, select the level of control you want to give to each user or profile.
13. If you specified this scorecard to be used in the Portal Dashboards, do the following:
  1. Select the Thresholds tab and set the scoring thresholds for the scorecard. See [Configuring Scoring Thresholds](#) to learn more.
  2. Select the Agents' Dashboard tab and set the agents or groups to have access to the scorecard in their dashboard. See [Configure Agent Access to a Scorecard](#) to learn more.
14. Click Save to save and continue editing, or Save & Close to save and exit the window.
