Nexidia Analytics and Language Support

The core capability of Nexidia Analytics is the transformation of the unstructured content of voice and digital customer contact interactions, whether they be phone calls, chats, SMS, social media, after-interaction surveys, etc. into forms needed by the various analysis tools in Nexidia Analytics. Nexidia Analytics uses many technologies to process this content, including post-call automatic speech recognition (ASR), real-time ASR, phonetic indexing and search, text indexing, natural language processing (NLP), and predictive models (Sentiment and Enlighten AI).

Each of the aforementioned technologies requires unique adaptation to each language. NICE are constantly adding support for new language to each component technology over time, releasing that support as soon as it is available, even if some other elements do not yet support that language.

Language Summary

For the following languages, Nexidia Analytics offers varying levels of support across the critical analysis capabilities.

Language	Phonetic Search / Queries	Text Search / Queries	Post-call ASR	Discovery	Explore	Auto-Discovery	Enlighten Behavior Models ¹	Sentiment	Real-Time ASR and Guidance	OOTB Redaction	Ontology
Arabic (East Maghrebi)	Y	Y	-	-	-	-	-	-	-	-	-
Arabic (Egyptian)	Y	Y	-	-	-	-	-	-	-	-	-
Arabic (Gulf)	Y	Y	-	-	-	-	-	-	-	-	-
Arabic (Iraqi)	Y	Y	-	-	-	-	-	-	-	-	-
Arabic (MSA)	Y	Y	-	-	-	-	-	-	-	-	-
Arabic (North Levantine)	Y	Y	-	-	-	-	-	-	-	-	-
Arabic (South Levantine)	Y	Y	-	-	-	-	-	-	-	-	-
