Welcome to Quality Central

In the Evaluations Portal, you can view and respond to evaluations that were published for you, perform self-evaluations, run and print reports, and view the Dashboard.

CONFIGURE YOUR BROWSER

Ensure that your browser is configured to accept cookies, to execute javascript, and that pop-ups are enabled. You must disable Compatibility Mode for Internet Explorer.

SCOPE OF THIS GUIDE

Who should use this guide?

Quality Central agents.

What is included in this guide?

- Working with evaluations.
- Viewing the dashboard.

What is not included in this guide?

- Quality Central Main, see the *Interaction Analytics User Guide*.
- Quality Central Evaluations Portal for Evaluators, see the *Quality Central Evaluator Workflow Guide*.

DOCUMENT REVISION HISTORY

SOFTWARE VERSION	DATE	DESCRIPTION
Quality Central12.5	November 2024	Documented about Enlighten Agent Behavior Dashboard Custom Thresholds, Metric and Metadata.

Evaluations

You receive an email alerting you to visit the Evaluations Portal when an evaluation or self-evaluation is published for you, or when additional events occur, such as coaching requests.

Depending on how your system is configured, you can perform some or all of these tasks:

- View a summary of all your evaluations.
- [Review evaluations.](#)
- Request coaching for an evaluation.
- Acknowledge coaching.
- Complete self-evaluations.
- Print an evaluation.
- View the enlighten behavior information in Live Alerts

When you access the Evaluations Portal, a list of your evaluations and self-evaluations are displayed in the grid. Self-evaluations have an S- at the beginning of their ID. When using the **Row Contains** search, ensure that you select the correct search date in the **From** and **To** fields.

Depending on the configuration in the Management Console, the search days vary. If the search dates do not match the configured value, a warning message appears.

You can change the default view of the evaluation grid as needed. Click the **Settings** icon to add or delete columns in the grid. You can see the Experience Id and Experience Sequence ID, if your supervisor sets it in their settings.

To enable the Settings icon, use the Management Console. For more details, contact your system administrator.

Under the grid, you can see:

- The Date range of the search results.
- The Number of times you were evaluated.

- The Average score of published evaluations, excluding any evaluation templates defined as Exclude score from average evaluation calculation
- The Number of pending evaluations.
- Experience Sequence, if your supervisor has set to view it.

You can view the date and time of published evaluations, which is stored in UTC format (Coordinated Universal Time). When a user opens the published evaluation, the system converts the UTC time to the user's local time zone. So, users in different time zones may see different dates and times for the same published evaluation.

If you believe a scoring error has occurred, you may request a rescore offline from your supervisor.

Items: 1 - 9 of 9

Between 10/07/2024 and 11/06/2024 you were evaluated 9 times, with an average score of 86.08% (0 evaluations not counted), 0 pending evaluations

The formatting of the status changes as per the changes in the evaluations. For example, for the evaluations that are not yet viewed, the formatting is bold, whereas for the viewed evaluations, the formatting is normal.

REVIEWING AN EVALUATION

When you receive an evaluation of your performance, you should acknowledge that you reviewed it. If there are multiple categories in the evaluation, they are listed in the Categories grid. The first category displays by default. To view all questions of all categories in one page, use the **View as single page** option. This will eliminate the need to navigate through categories. If the total number of questions on the evaluation form exceeds 200, this option will be disabled.

→ To review an evaluation:

1. In the Evaluations Portal main window, click the ID for an evaluation or self-evaluation to open an Evaluation Form. You can also select the evaluation or self-evaluation and click the **View** button to open the Evaluation Form.

The screenshot shows the 'Evaluation Form' interface. At the top, it displays the template 'Rebate Handling' and the agent 'Del, Carl [x]'. The 'TYPE OF REBATE' category is selected, showing a score of 12.00 / 20.00. The table below lists two questions:

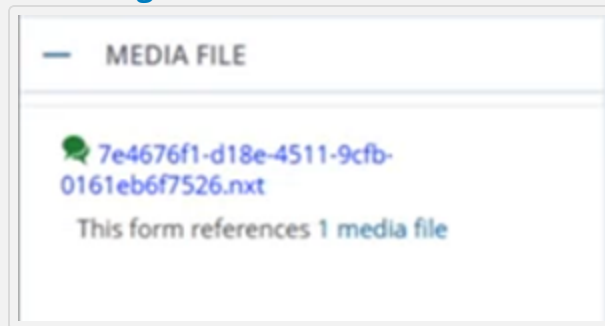

QUESTION	ANSWER	POINTS	NOTES
Is this a Modern Rebate?	☒ Yes ☐ No	10 / 10	PLAY "Yes"
Was the agent able to correct the rebate issue?	☐ Yes ☒ No ☐ n/a	2 / 10	n

Below the table, there are checkboxes for 'View as single page' and 'Request Coaching...'. At the bottom, there are buttons for 'COACHING...', 'PRINT', 'ACKNOWLEDGE', and 'CLOSE'.

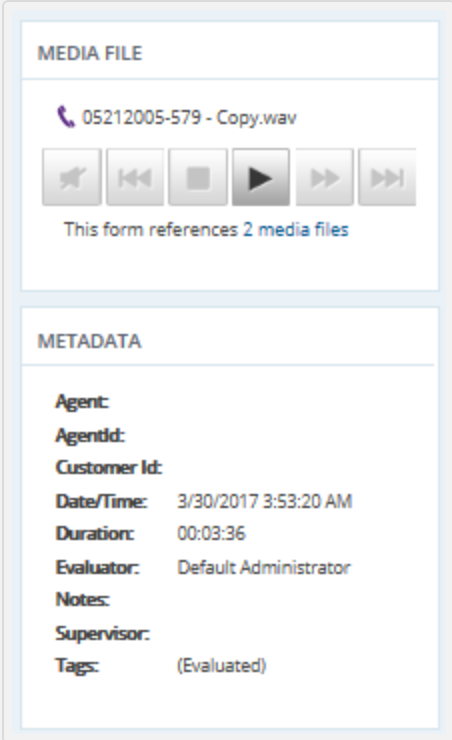

2. (Optional) Review the interaction file associated with the evaluation:

- For audio interactions, to launch the file playback, click **Play/Pause** in the **Media File** area. Click **Stop** when you finish listening to the media file. See [Playing Back Interactions](#) on page 11 to learn more.
- Click on the reference media file link to open the list of available reference media files. In the list, click the required media file to listen it.
- For chat evaluations with screen recordings, click the media file name in the media file area to launch the Pluggable Player with chat interactions and agent's screen recording. See [Playing Back Interactions](#) on page 11 to learn more. The Pluggable Player is not accessible through the <n> media files or external player links.

View Image

- For chat, email, and text interactions, to display the contents in the **Metadata** grid, click the file name. You can expand the contents into a movable window as needed.

The screenshot displays a user interface for reviewing an evaluation. It features two main sections: a 'MEDIA FILE' section and a 'METADATA' section. The 'MEDIA FILE' section includes a play button icon, the filename '05212005-579 - Copy.wav', a set of media control buttons (play, previous, stop, next, full screen), and a text link stating 'This form references 2 media files'. The 'METADATA' section lists various fields: Agent, AgentId, Customer Id, Date/Time (3/30/2017 3:53:20 AM), Duration (00:03:36), Evaluator (Default Administrator), Notes, Supervisor, and Tags ((Evaluated)).

3. Review the evaluation information for the first category:

- Score
- Weighted Score (The weighted score only displays if the template that was used is configured for category weighted scoring)
- Question
- Answer
- Points
- Evaluation and category level Notes (The question, category and evaluation level notes will be displayed only if the template that was used is configured with appropriate view or edit notes access rights.)

You can adjust the text size of the evaluation form. You can also view audited or rescored evaluations.

4. To view the evaluation information for the next category, click **Next<Category Name>** or select the another category in the Categories box.

5. (Optional) Request coaching for a category or question. See [Requesting Coaching](#) on page 21 to learn more.
6. (Optional) To acknowledge the evaluation, click **Acknowledge** and then click **Yes**.
7. (Optional) Click **History** to view the evaluation history.
8. When you finish reviewing the evaluation, click **Close** on the evaluation form to return to the Evaluations Portal Main window,

PLAYING BACK INTERACTIONS

There are two playback options:

- Click **Play** to start playing the interaction.
- Click **Remote Playback** to log in remotely. After you log in, the Player opens in a new window and the interaction is played back.

If the **Play** or **Remote Playback** buttons are not available, make a note of the Interaction ID and access it directly from the original recording source.

If the **Playback.EnforcePlaybackAuthorization** parameter in the Management Console is set to true, then your administrator can configure you to have permissions for specific sessions, data restrictions, and hierarchies. If you try to play files you do not have permission to play, the following error message displays: "User doesn't have access to view/play the requested media [media_ID]."

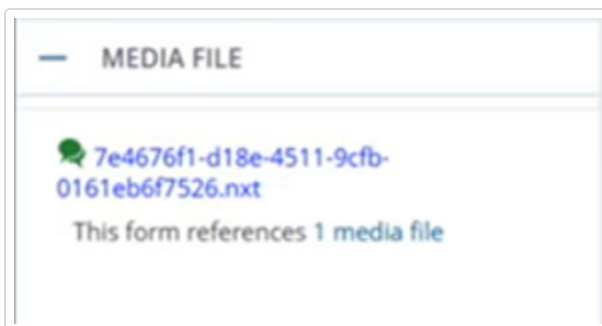

Pluggable Player

The pluggable player is a standalone player that opens in a new window when you click an interaction to review. The left side panel is collapsible.

The **Playback.Enable.PluggablePlayerForChat** Management Console configuration enables playback of screen recordings while viewing a chat in the pluggable player.

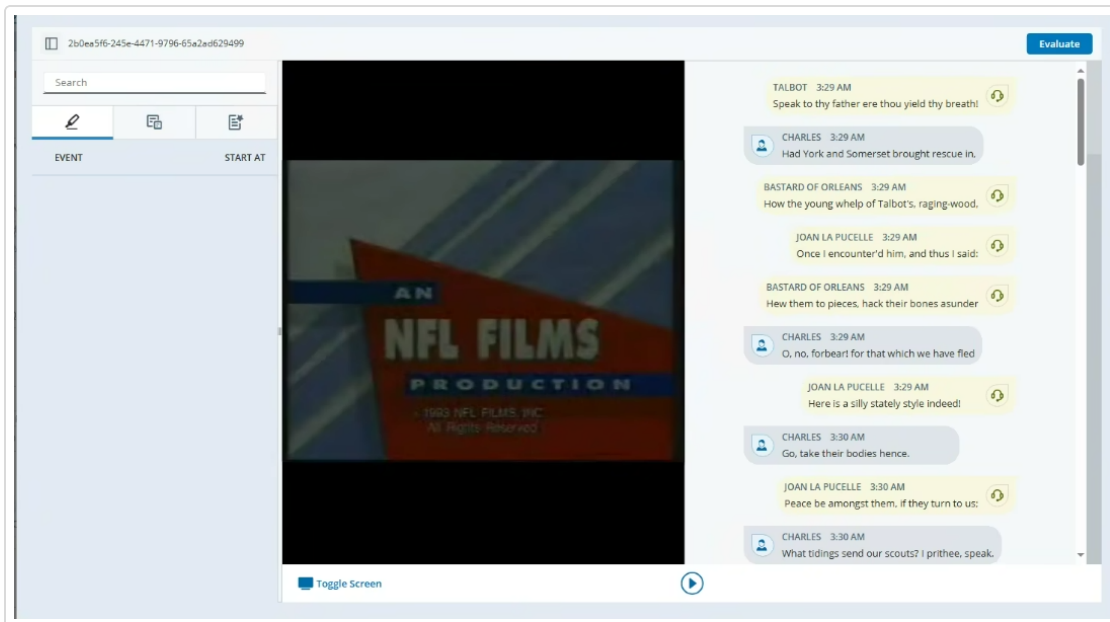

Chat evaluations with screen recordings - You can click the media file name in the media file area to launch the Pluggable Player with chat interactions and agent's screen recording. The Pluggable Player is not accessible through the <n> media files or external player links.

View Image

Launching the Pluggable Player offers the following benefits:

- Provides a comprehensive view of chat interactions allowing reviewers to simultaneously analyze the agent's screen actions and chat conversations in a unified, interactive playback experience. This leads to more accurate and efficient evaluations.
- Solves the timestamp tracing issue for multiple chats. Earlier, clicking a chat only opened chat bubbles, making it difficult to trace actual timestamps in recordings with multiple chats. Now, when a user clicks a chat with screen recording in the evaluation form, the Pluggable Player launches, aligning chat content with visual context.

External Playback

The External Playback option allows users to access third-party interactions from QC Evaluation Form templates. The tooltip displays the external URL when you hover the mouse over the external link. The external playback link in the metadata requires configuration from the customer.

If you try to play or download a locked CXone interaction, you will see an error message. The interaction might be locked to prevent media playback for VIP calls or for interactions older than 3 months. To unlock the interaction, contact your administrator.

You can control the display of internal media link. To hide the internal media link, go to Evaluation Portal > QC Admin > Localization > Settings, and select **Hide internal media link in EFI**.

→ To configure external playback:

1. In the QC Portal from Administration > Settings, select from the dropdown which metadata field in the evaluation form template will link to the third-party interaction. Click **Save**.
2. To add an external link to a template, you must add the relevant metadata category to the template Metadata section. Add the relevant field, click **Add**, and then click **OK**.

The screenshot shows the 'Evaluation Form' configuration page. On the left, there's a sidebar with 'CATEGORIES' and 'MEDIA FILE' sections. Under 'MEDIA FILE', 'External Link' is highlighted with a red box. The main area shows 'CATEGORY A' with a table of questions (List Q1, List Q3, List Q4) and their points. The 'External Link' option is visible in the Media File section.

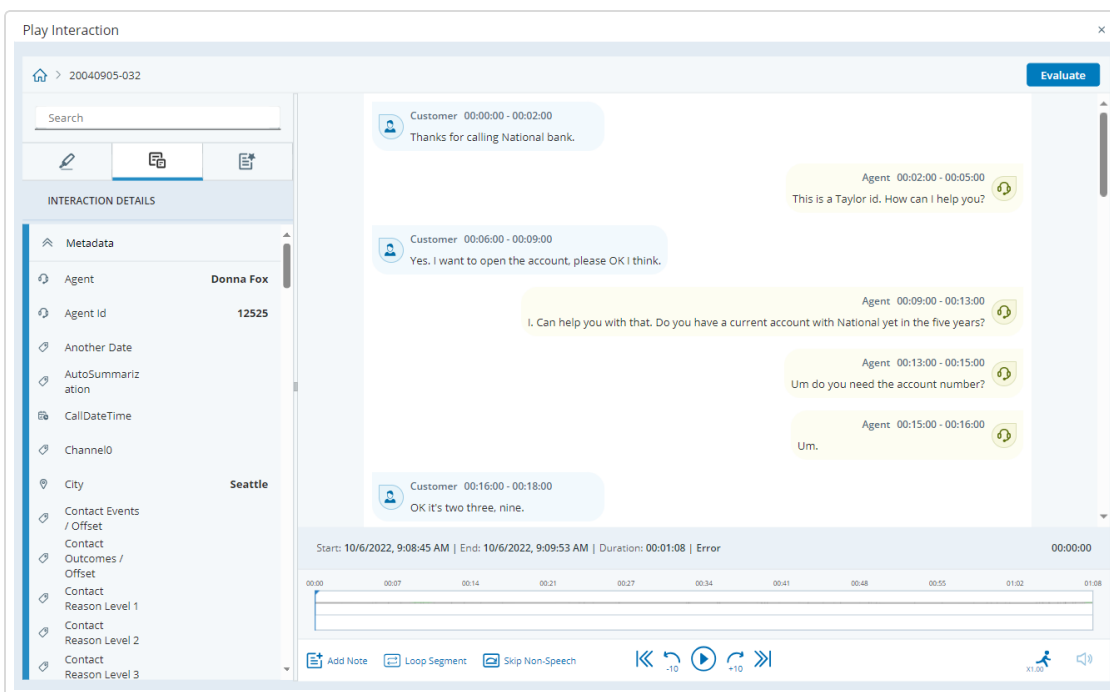

3. The External Link will display as an option in the Media File section of the Evaluation Form Template.

You can view the following during playback:

Customer and agent information is displayed in the waveform. When you play back interactions using the **Play** button, you can view and add:

- General notes
- Notes on a specific location within the interaction
- Tags

Playback is site-dependent. Agent and supervisor privileges depend on the administrator's system configuration. For example, agents can edit and delete their notes, and supervisors can edit and delete anyone's notes.

The player's left side shows the hits, metadata of the interaction, and theTopic AI data (Summary, Intents, Actions and Outcomes). You can also search for keywords in the player.

The following controls are available while you are listening to an interaction:

- Evaluate - Evaluate an agent.
- Hit Marks - The vertical color-coded lines that signify the location of the hits within the file. Hit marks identify non-talk time and the search terms, queries, and term lists used.
- Add Note - Add a note about a selected hit.
- Toggle Segments - Toggles customer or agent crosstalk and non-speech segments. Crosstalk is identified by shading the area of both the agent and customer channels for the duration of the crosstalk.
- Loop Segment - Repeats the segment.
- Skip Non-Speech - Skips over non-speech in the call.
- Previous Hit - Plays the previous hit.
- -10 - Goes backward 10 seconds.
- Play/Pause - Starts and stops playback.
- +10 - Goes forward 10 seconds.
- Next Hit - Plays the next hit.
- Speed Control Slider - Displays current speed rate.
- Volume Control Slider - Raises or lowers volume.
- Toggle Screen - Toggles a view in a video file.

When two or more agents are recording their screens, only the screen of the agent who is being evaluated is played back.

PERFORMING A SELF-EVALUATION

At times, your supervisor might ask you to evaluate your performance. When your supervisor wants you to evaluate yourself, it shows in bold font on the evaluations page. If the template lets you see or change the notes, you can see the question, category, and evaluation level notes.

You can also start a self-evaluation by clicking **Evaluate** as follows:

- With media: Dashboard > Interaction Scorecard > Examples > select the media to evaluate
To turn on Examples, use the Management Console. If you need more help, ask your system administrator.
- Without media: Evaluations grid

What is the difference between a self-evaluation a supervisor initiates and a self-evaluation an agent initiates?

SUPERVISOR-INITIATED	AGENT-INITIATED
The evaluation is included in reporting.	The evaluation is not included in reporting.

→ To perform a self-evaluation:

1. Click the ID for a self-evaluation.

ID Contains

From 11/01/2025

S-1327	Test user	Calibration Template	Carl Del		0 / 0 - (0.00%)	12/1/2025 3:01:22 AM					Published	

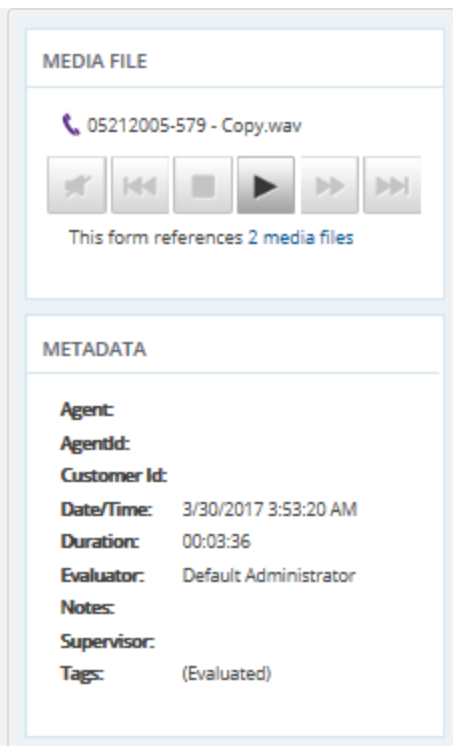

2. For agent-initiated self-evaluations, in the Evaluation Form, select an evaluation form template by clicking **Change**.
3. If there is an interaction file associated with the self-evaluation, you can review it:
 - For audio interactions, to launch the file playback, click **Play/Pause** in the **Media File** area. Click **Stop** when you finish listening to the media file. See [Playing Back Interactions](#) on page 11 to learn more.

- For chat evaluations with screen recordings, click the media file name in the media file area to launch the Pluggable Player with chat interactions and agent's screen recording. The Pluggable Player is not accessible through the <n> media files or external player links.

View Image

- For chat, e-mail, and text interactions, to display the contents in the **Metadata** grid, click the file name. You can expand the contents into a movable window as needed.

This form references 2 media files

METADATA

Agent:
 AgentId:
 Customer Id:
 Date/Time: 3/30/2017 3:53:20 AM
 Duration: 00:03:36
 Evaluator: Default Administrator
 Notes:
 Supervisor:
 Tags: (Evaluated)

4. Complete the questions for the selected category in the **Category** grid:
 - If a hint has been provided for a question, a **Hint** link displays next to it. Click **Hint** (and attachments if any) to view the hint for the question.
 - Questions may have default answers, which you can change.
 - Some of your answers may cause failure of the current category or even the entire evaluation. You receive a warning message if this situation arises.
 - You can also create a note for certain responses you give.
 - The score initially displays as *Score: 0/0* unless the template has default answers. Default answers are taken into account from the time the evaluation form is opened. As you complete the self-evaluation, the scores automatically update. Depending on how the form was created, you may or may not see updates to the *weighted score*.
5. You can create a note for the selected category in the **Notes for <category name>** box.
6. Select the next category by either:

- Clicking **Next: <category name>**.
 - Selecting the category in the **Categories** box.
7. You can write notes for a category up to 10,000 characters. Click the **Expand** icon to add or change the text in the notes.
 8. Complete the above steps for the remaining categories.
 9. If you click **Save & Close** before publish, the Time to Publish message displays.

The time you take to evaluate your work keeps adding up until it's published. To count only the time you spend editing and not the saved draft time, uncheck the **Add Draft mode time in Time to Publish** box under Settings.

The Time to Publish message is displayed only when the **Add Draft mode time in Time to Publish** checkbox is selected. The change in the checkbox selection does not change the time to publish calculation method for the evaluations that are complete or are in progress.

10. Click **Publish**. An entry for the published self-evaluation is displayed in the grid in the **My Evaluations** tab for your supervisor, in addition to the **Evaluations Portal** grid. The **Publish** button is enabled after you have completed all required questions in the evaluation form. Depending on how your system is configured, you can subsequently edit your self-evaluation for some specified time. Once that time has passed, and if the evaluator has published the self-evaluation, you can view the evaluator's data for the

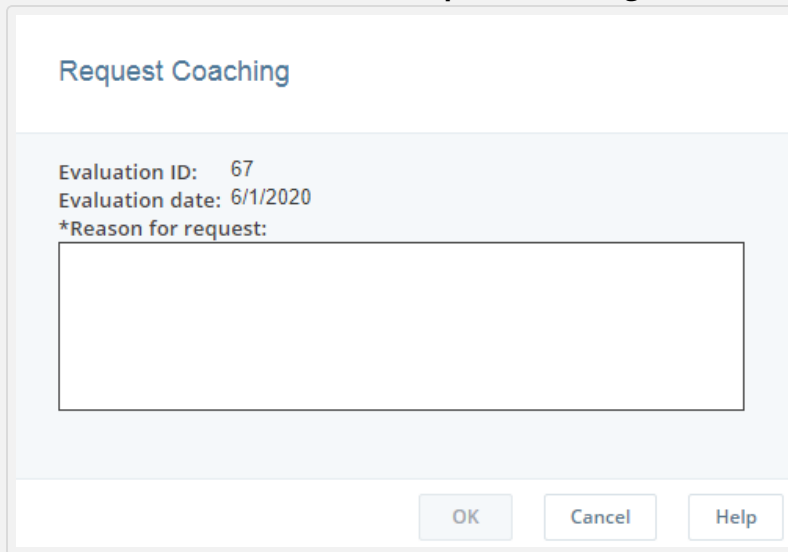

form.

REQUESTING COACHING

You can ask for coaching based on evaluations that have already been conducted for you. You must submit coaching requests from the Category view. You can cancel a pending request for coaching at any time by clicking **Cancel Coaching Request** in the Coaching Request window.

→ **To request coaching:**

1. In the evaluation form, click the **Request Coaching** link.

Request Coaching

Evaluation ID: 67
Evaluation date: 6/1/2020
*Reason for request:

OK Cancel Help

2. (Optional) If the **View as single page** is selected, clear the checkbox to be able to request coaching.
3. Enter the reason for requesting coaching in the coaching request window.
4. Click **OK** to confirm and return to the evaluation form.

ACKNOWLEDGING COACHING

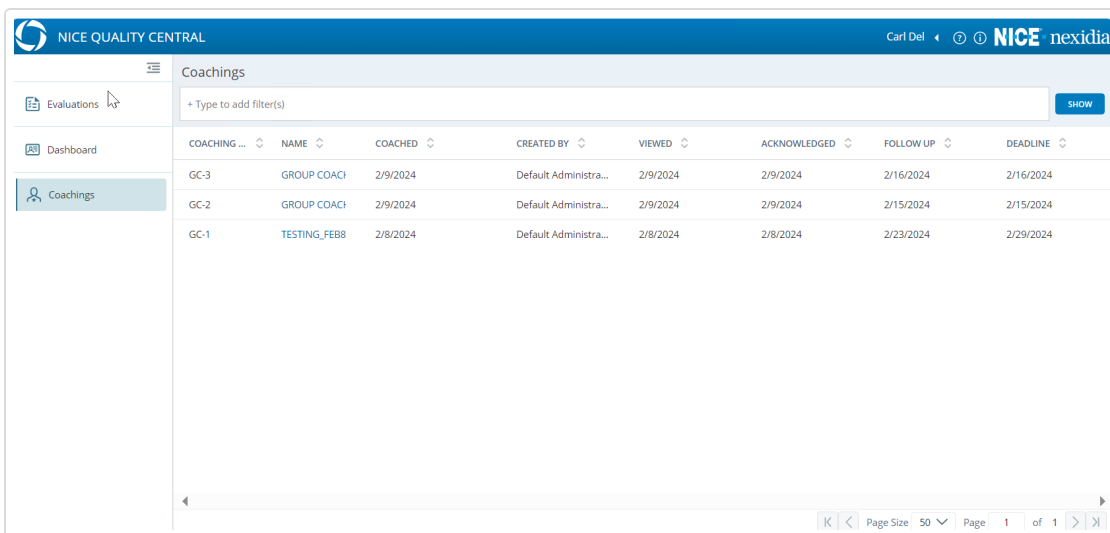

After a coaching session, as the agent, you need to review the notes and confirm your understanding.

→ To acknowledge coaching:

1. Go to **Evaluations** and select the evaluation.
2. Click **Coaching** on the right lower side of the user interface.
3. Review the coaching notes and activities assigned. Check for any required actions. If a link is provided, open it and complete the coaching.
4. Select the **I have reviewed this coaching data** checkbox. You can add any notes about the coaching data, up to 1000 characters.
5. Click **OK**.

COACHING

After a coaching session, as the agent, you need to review the notes and complete the coaching assigned. Unattended or unacknowledged coaching is highlighted.

The screenshot shows the NICE Quality Central interface. The top navigation bar includes the NICE logo, the text 'NICE QUALITY CENTRAL', and the user name 'Carl Del'. The left sidebar contains navigation links for 'Evaluations', 'Dashboard', and 'Coachings'. The main content area is titled 'Coachings' and features a table with the following columns: COACHING, NAME, COACHED, CREATED BY, VIEWED, ACKNOWLEDGED, FOLLOW UP, and DEADLINE. The table contains three rows of data. The first two rows are highlighted in light blue, indicating they are unattended or unacknowledged. The third row is not highlighted.

COACHING ...	NAME	COACHED	CREATED BY	VIEWED	ACKNOWLEDGED	FOLLOW UP	DEADLINE
GC-3	GROUP COACH	2/9/2024	Default Administra...	2/9/2024	2/9/2024	2/16/2024	2/16/2024
GC-2	GROUP COACH	2/9/2024	Default Administra...	2/9/2024	2/9/2024	2/15/2024	2/15/2024
GC-1	TESTING_FEB8	2/8/2024	Default Administra...	2/8/2024	2/8/2024	2/23/2024	2/29/2024

→ **To acknowledge coaching:**

1. Click **Coachings** from the left menu and select the coaching name you want to review.
2. On the Group Coaching window, review the coaching notes and assigned activities. Check for any required actions and attachments. If a link is provided, open it and complete the coaching.
3. Select the **I have reviewed this coaching information** checkbox. You can add any notes about the coaching data, up to 1000 characters.
4. Click **OK**.

Any changes to the group coaching later will reset the acknowledgment status to pending for all agents.

Filters

You can find a coaching session using filters:

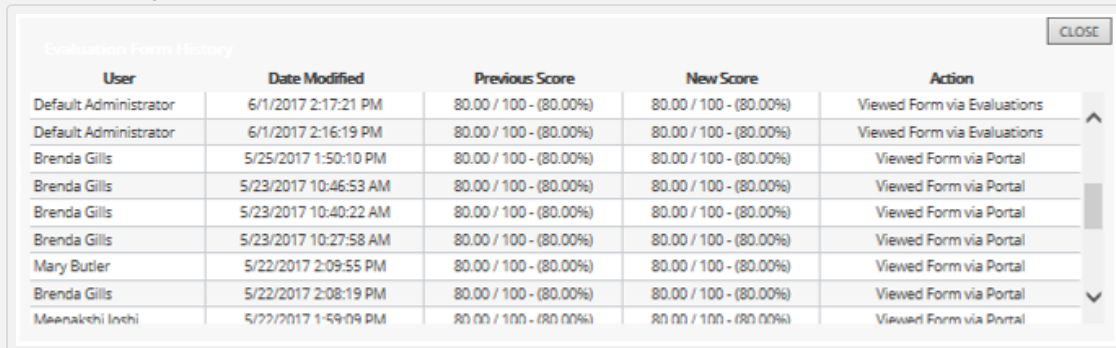

1. In the **+Type to add filter(s)** box located on the top of the user interface, click to select a filter from the drop-down list or enter the filter name. You can select the following filters:
 - **Acknowledgment Status**—By the acknowledgment status of the coaching - **Yes**, **No**, or **All**. Select **All** to view all coaching sessions.
 - **Created by**—By the name of the user who created the coaching.
 - **Date Range**—By the date range within which the coaching is assigned.
 - **Name Contains**—By the name of the coaching. This filter is case-sensitive and shows results with the matched text.
2. Click **Show**.

VIEWING EVALUATION HISTORY

You can view the previous events associated with the evaluation form.

➔ To view history for an evaluation:

1. Click **History** on the evaluation form.

The screenshot shows a dialog box titled "Evaluation Form History" with a "CLOSE" button in the top right corner. The dialog contains a table with the following data:

User	Date Modified	Previous Score	New Score	Action
Default Administrator	6/1/2017 2:17:21 PM	80.00 / 100 - (80.00%)	80.00 / 100 - (80.00%)	Viewed Form via Evaluations

Meenakshi Inchi	5/22/2017 1:59:09 PM	80.00 / 100 - (80.00%)	80.00 / 100 - (80.00%)	Viewed Form via Portal

2. View the previous events associated with the evaluation form:
 - The original evaluation
 - Coaching data that was added or edited
 - Coaching verification
 - Previous appeals and their rulings
 - Audit information
 - Information about when the evaluation was viewed or edited
3. Click **Close**.

Performance Dashboard

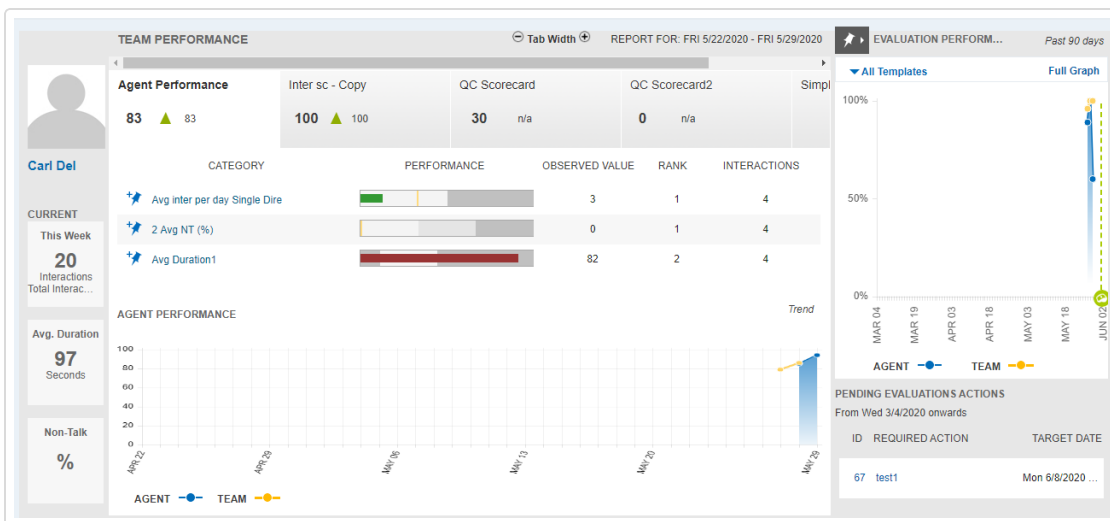

The Dashboard provides a snapshot of your data—for example, how you are performing, performance trends compared to the previous 3 weeks, and compared to your team on the same quality initiatives. The Dashboard tracks performance data week to week. The **Report For** indicator at the top shows the 7-day period used for compiling the report.

To customize the performance period, use the Management Console. For more details, contact your system administrator.

WHAT CAN YOU DO ON THE DASHBOARD?

The Team Performance panel displays predefined scorecards. The panel can display up to nine scorecards at a time. To see long scorecard titles, you can change the width of the scorecard tabs using the **Tab Width** controls in the top-right of the panel.

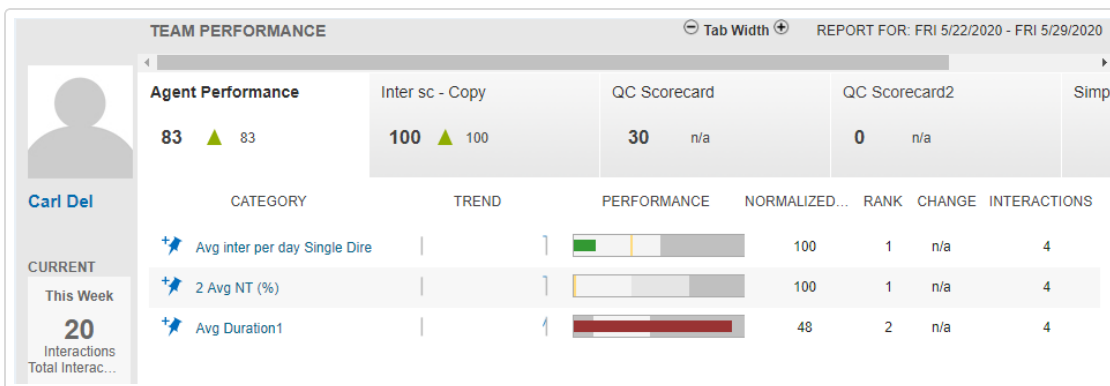

Each scorecard displays team performance parameters with respect to predefined KPIs. You can select the required scorecard to list all the specified KPIs and to view the related performance parameters for each KPI. The performance parameters include normalized or observed score, rank, trend chart, and total number of evaluations or interactions. The rank is calculated based on the normalized or observed score. Click the pushpin next to a KPI or category to toggle on or off the watch list. The watch list is used to view areas that you may want to keep an eye on. You can click on items to add or remove them from your watch list.

VIEWING NORMALIZED SCORE

Normalized Score is the default displayed score for all type of scorecards. Based on the evaluation scoring method, the actual score is calculated, normalized and then displayed.

The rank is also calculated based on the normalized score and displayed in the dashboard.

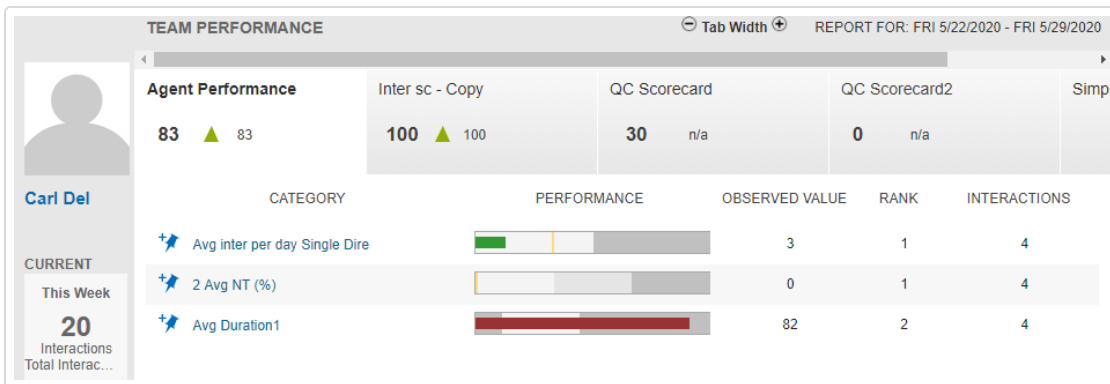

VIEWING OBSERVED SCORE

Based on your system configuration, the observed score is displayed in the Team Performance panel.

To view the observed score, your system administrator must select the **View Dashboard in Observed score** checkbox in the QC Portal under Admin > Settings.

Based on the evaluation and metadata scoring methods, the actual score is calculated and then displayed. This score doesn't get normalized. You must use this score type when you want to view the actual score rather than normalized score. The observed score also helps to calculate the rank accurately. The observed score changes based on the type of goal and threshold range that is specified by your system administrator while defining a scorecard.

When you view the observed score, the Trend and Change columns are not displayed.

The following table explains some sample scenarios.

GOAL TYPE AND THRESHOLD RANGE	SCORE	RANK
Single Direction with Caution		
Good 0-70	55	1
Caution 70-100	83	2
Out of Bound 100 -	115	3
Bi-Direction with Caution		
Out of Bound 0-70	65	-2
Caution 70-100	98	-1
Good 100-110	110	1
Caution 110-150	140	2
Out of Bound 150 -	170	3

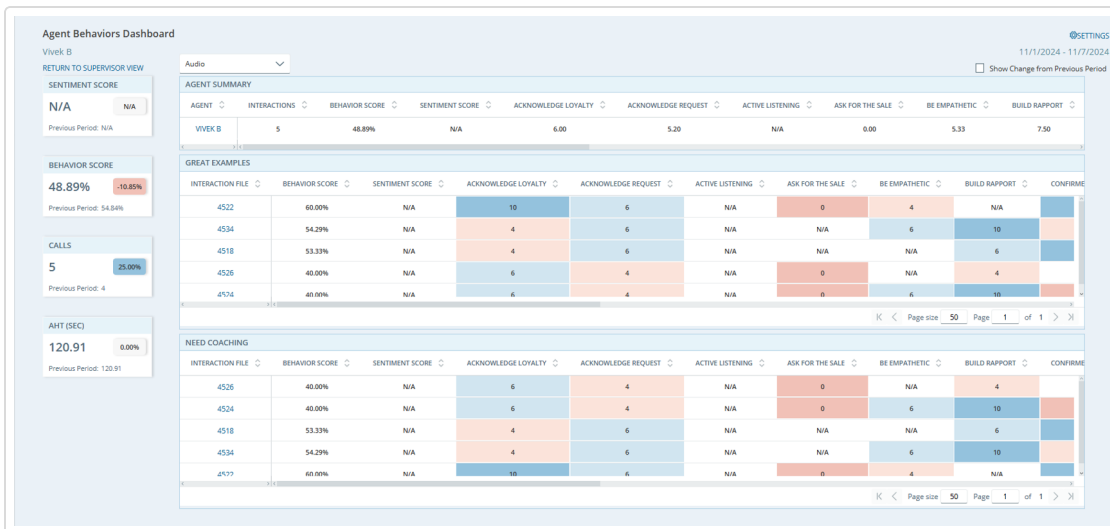

For example, you can:

- View the trend chart that shows team or agent performance over the current period (7 days):
 - You can toggle between the observed value and the normalized trend. If a scorecard is selected in the trend, then only the normalized score is available.
 - Select a category in the Interaction Performance grid to show performance for that category in the Trend chart.
- Review your evaluation performance for the past 90 days in the Evaluations Performance area:
 - Click the pushpin to toggle the Watch List view and the Evaluations Performance view. The watch list displays only the normalized score related data and doesn't support observed score related data.
 - View coaching dates represented with a vertical green line with a circle at the end pointing to the date on the x-axis when the coaching took place. When you mouse over the image, a Coaching Provided tooltip displays. You can click the green circle at the end of the green line to display the Coaching window for this item.
- Resolve pending actions:
 - Click the evaluation ID that contains to the pending required action to launch the evaluation.
 - If the required action is a knowledge base item or a link, you can click to open it. Opening the knowledge base item updates the row in the table to indicate that this item has been completed. It is removed the next time the page is refreshed.
 - Deadlines displayed in red text are due within 3 days of the current date. The pending coaching action start date is calculated using the past 90 days from the current date. The pending coaching actions can be seen from 12/10/2019 onwards.
- View and play back your interactions (this feature is permission based):
 - Select and double-click on a **scorecard** category column and then click **Examples**. The Media Player window displays the interactions associated with the scorecard. To enable Examples, use the Management Console. For more details, contact your system administrator.
 - Click on a specific supported type of file such as .wav, chat or text file to open the recorded interactions. For more information, see [Playing Back Interactions](#) on page 11.

AGENT BEHAVIORS DASHBOARD

This dashboard shows how the agent is performing in terms of their soft skill behaviors for all the interactions over a selected period. You can view the dashboard only if it is configured in the management console. The dashboard shows behavior data based on the date range set in the management console.

To view this dashboard, click the  **My Behaviors Dashboard** icon in the Portal application.

Here's what you can do

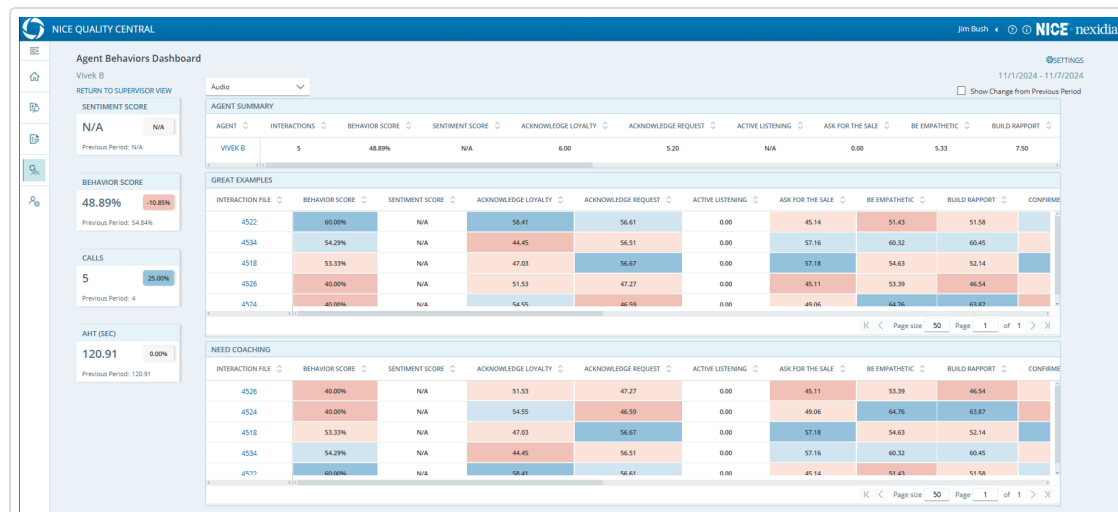

- You can choose to see data for either audio or chat interactions from a drop-down menu.
- In the left pane, you can see the average sentiment score, average behavior score, total calls, and average handling time of calls (AHT) of the agent. The difference in these metrics compared to the last period is shown as a percentage. A higher score from the previous period is shown in dark blue, while a lower score is shown in dark orange.
- In the Agent Summary section, you can see:
 - A summary and details of behaviors for all interactions listed.
 - The overall behavior score of all interactions.
 - The average sentiment score of all interactions.
 - The average index score value of respective behaviors such as acknowledge loyalty, acknowledge request, active listening, etc.

- How behavior data has changed over time using the **Show Change from Previous Period** option. The difference is shown in percentage.
- The Great Examples section lists interactions where the agent excelled. These interactions are sorted based on the descending behavior scores. The Need Coaching section lists interactions where an agent needs coaching for soft skill behaviors. These are sorted based on the ascending behavior scores. To listen to an interaction, click the interaction link in the respective interaction file column. Ensure that you have access to see and play back recorded interactions.

The scores of behaviors (acknowledge loyalty, acknowledge request, etc.) can be shown as a raw score or an index score.

Raw Score

Raw Scores are generated from the Enlighten Customer Satisfaction Behavioral Model. Raw scores can range from negative to positive infinity. When the models are deployed, adding 50 to the raw scores makes it less likely for them to be negative. By default, the behavior scores are shown as raw scores, for example, acknowledge loyalty 58.41. As Raw Scores have such a large range, it is recommended to utilize index scores because they derive from Raw Scores.

Scores are colored to make it easier to see which agents are doing well or need coaching.

When the scores of behaviors are shown as raw score, they are colored as follows:

Dark Blue—Score is in the top 25%

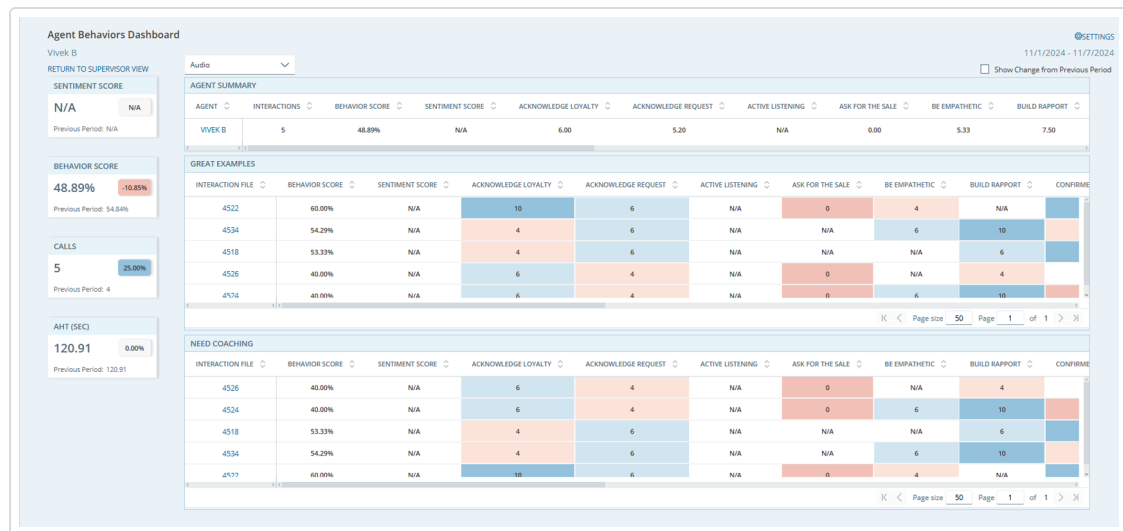

Light Blue—Score is in the higher 50%, but less than the top 25%

Light Orange—Score is in the lower 50%, but greater than the lowest 25%

Dark Orange—Score is in the lowest 25%.

Index score

This scoring method classifies each behavior into whole number groups based on how the interaction ranks among all interactions. It is shown as a number between zero and ten, for example, acknowledge loyalty 10. To see the score of behaviors as an index score, it should be configured in the management console.

The index scores for each behavior are colored as follows:

- Dark orange—Score of 0
- Light orange: Score of 4
- White: Score of NULL or N/A
- Light blue: Score of 6
- Dark blue: Score of 10.

Settings

Setting in the portal allows you to configure language and accessibility options.

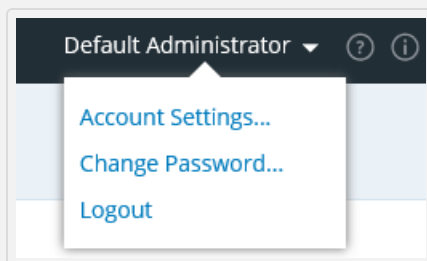

ACCESSIBILITY

Quality Central supports accessibility. You can use **Account Settings** to enable accessibility and to select the desired language.

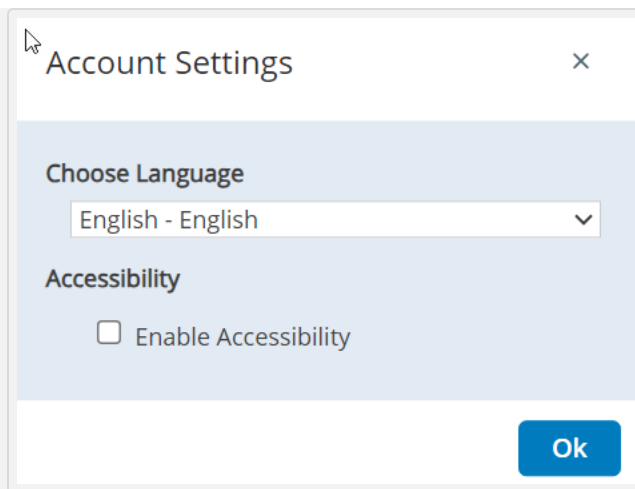

You can use Quality Central in any of the supported languages. The supported languages include Russian, Simplified Chinese, Traditional Chinese, Korean, German, Portuguese, French, and Japanese. When you localize the User Interface (UI) and use the minimum resolution 1280*1024, some of the UI items may not be visible. Zoom out the page to select the required elements.

ACCOUNT SETTINGS

1. Click the drop-down arrow to the right of your username in the top right side of the application main window.

2. Click **Account Settings**.

3. (Optional) In the **Choose Language** drop-down, select the desired language. The default language is *English*.
4. (Optional) Select the **Enable Accessibility** checkbox to enable Accessibility.
5. Click **OK**.
