
Appealing Evaluations

The appeals process follows one of two paths, depending on whether the evaluation was audited. You can only re-appeal the same questions originally appealed. The re-appeal question must propose the same answer suggested in the original appeal.

Your system administrator defines the time window for appeals.

The notes for category let you add text up to 10,000 characters. Click the Expand icon to add or edit the complete text in the notes.

The evaluation has not been audited

If the evaluation has not been audited, the process is:

1. Original evaluation of agent (see [Evaluating an Agent](#)).
2. Appeal of one or more questions (see [Appealing or Re-Appealing a Question](#)). After an appeal, the evaluation cannot subsequently be audited.

An appeal lockout period may be in effect, depending on your system setup. Contact your system administrator to see if your system uses an appeal lockout period.

3. Rule on appeal.
4. Re-appeal (see [Appealing or Re-Appealing a Question](#)).

Re-appeals are optional, and may not be allowed in your system setup. Contact your system administrator to learn the number of re-appeals allowed for your system.

5. Rule on re-appeal. Note that this part of the process is only applicable if the evaluation was re-appealed.

The evaluation has been audited

If the evaluation has been audited, the process is:

1. Original evaluation of agent (see [Evaluating an Agent](#)).
2. Audit of the original Evaluation. An audit lockout period may be in effect, depending on your system setup. Contact your system administrator to see if your system uses an audit lockout period.

After an audit is performed on an evaluation form, the agent cannot appeal it, although the original evaluator may do so.

3. Appeal of one or more questions (see [Appealing or Re-Appealing a Question](#)). An appeal lockout period may be required, depending on your system setup. Contact your system administrator to see if your system uses an appeal lockout period.
4. Rule on appeal.
5. Re-appeal (see [Appealing or Re-Appealing a Question](#)). Re-appeals are optional, and may not be allowed in your system setup. Contact your system administrator to learn the number of re-appeals allowed for your system.
6. Rule on re-appeal. This part of the process is only applicable if the evaluation was re-appealed.

Lockouts

Depending on your system configuration, you must wait for a specific period before appealing or auditing an evaluation. This time period, measured in days from the evaluation's publication, allows agents and auditors to appeal or audit the evaluation. Contact your system administrator to determine if your system uses a lockout period for appeals and the duration of that period.

Appeals at level 2 and above have limited support for evaluations using templates with branching or linking configured.
